## → Introduction to the event

After 10 editions of experience, DeciElec is recognised as benchmark event dedicated to embedded systems, to energy management (generation and storage) and to energy conversion.

Over 2000 participants have benefited from our unique business convention since the first convention :

- ▶ More than 3000 private meetings about embedded systems applied to railway, aeronautics / space, automobiles, shipping and industry.
- ▶ A convention for canvassing linked to embedded systems, to electric power and to energy management systems.

Over the two days of the 2009 edition, 450 people representing 300 companies came to trade.

## Who takes part?

### PRIME CONTRACTORS :

Purchasing Manager, R&D Directors, Technical Director, Projects Manager, Design Office...

- ▶ Aeronautics / Aerospace
- ▶ Agricultural Machinery
- ▶ Armament
- ▶ Automotive
- ▶ Home appliances
- ▶ Industrial vehicles / equipment
- ▶ Medical equipment
- ▶ On-board communication
- ▶ Rail
- ▶ Renewable energies
- ▶ Urban & road transport
- ▶ Yachts...

### SUPPLIERS of embedded systems

- ▶ Batteries & energy storage
- ▶ Connectors
- ▶ Electric & electronics cabling
- ▶ Electronics components
- ▶ Electronic sub-contracting
- ▶ Embedded software
- ▶ Hardened industrial PCs
- ▶ Internet communication
- ▶ Optical fibre
- ▶ Photovoltaic collector & renewable energy
- ▶ Power electronics
- ▶ Real time network
- ▶ Study offices...

## → Our methodology:

### 1 - Your registration form:

Fill it in with a detailed description of your needs or skills.

### 2 - Technical catalogue:

The technical catalogue will be available on the Internet two to three weeks before the convention. It includes presentation fact sheets on prime contractors and suppliers, as well as the program of solution-oriented workshops and colloquia. You will be handed over a copy of this catalogue on your arrival at the convention.

### 3 - Your selection:

You can study the technical catalogue in order to select the companies you wish to meet on pre-scheduled appointments.

### 4 - Validation:

We submit the list of suppliers wishing to meet the prime contractors, for validation by them.

### 5 - Schedule:

A few days before the convention, you will receive your prescheduled appointment roster, including workshops and colloquia.

# DeciElec

International conference for electrical power and energy management systems in parallel to Business meetings.

2 days to get the know about and trade information on electrical power and energy management systems along with its application in Industry, Transport – railways, aviation and automobile.

- **Electrical power in the coming years**
- **Advances in power components and Smart systems**
- **Batteries : what types and their environments**
- **Item on electric aeroplanes**
- **Electric vehicles market : advances, outlooks**

## At the 10<sup>th</sup> edition of DECIELEC, the participants said :

“Concentrating on 16 Business meetings and 6 conferences in 2 days meant that our needs were very effectively met. I thank the organisers for having taken care all the logistics which meant that I could attend the convention. “

▶ **ENGLAND WEI, Project Director, Peugeot Motorcycles**

“Good Organisation, varied yet specific themes. Good balance between small businesses and Contractors.”

▶ **Ariane SAINT-PIERRE, Research and technology, HISPANO-SUIZA**

“Maximum contacts / Meetings in a short amount of time. Immediate business return following the 2 days of the convention: much appreciated during this difficult period.”

▶ **Olivier PAULY, Manager, ACTEQ**

“Numerous contacts and genuinely motivated. An efficient business with the right know. A really pleasant place where the real subjects could be “clearly” dealt with. Excellent preparation for the meetings: efficient selection of target prospective clients. “

▶ **Claude GAVEAU, Commercial Director, and Patrick SOGHOMONIAN, General Director, SEPROLEC**

“Excellent level of business present, with technological competences in R&D.”

▶ **Patrick PIETRZAK, Technology Purchasing Director, ZODIAC DATA SYSTEMS.**

→ **For 90% of participants**  
the 2009 edition of DeciElec responded to there expectations.

→ **95% of contractors**  
declared that the exhibitors present corresponded to their type of research competences.

→ **97% of suppliers**  
found the pre-scheduled business meetings concept excellent or good.

Located in the immediate vicinity of key users and manufacturers of embedded systems – ALSTOM Transport, AIRBUS, EADS, CEGELEC, SAFRAN, CONTINENTAL AUTOMOTIVE, THALES, ...

DECIELEC is the event that will count in your industrial dynamic. Embedded systems are one of the specialties of the Midi-Pyrénées. It constitutes one of the major axes of development in the region, together with aeronautics and space.

**Organisers and Partners:**

**ALSTOM**

DeciElec is co-financed by European Union. Europe is committed to Midi-Pyrénées with the help of Europe Regional development fund.

**In collaboration with:**
